Education

University of Arkansas

Expected May 2028

Bachelor of Science in Computer Science, Minor in Mathematics

GPA: 4.0

- Member of the Honors College
- Relevant Coursework: Software Engineering, Database Management Systems, Honors Programming Paradigms, Introduction to Game Design I & II, Linear Algebra

Skills

Programming Languages: C++, C#, Python, SQL (T-SQL, Oracle SQL), GDScript, Java, JavaScript
Experience in Microsoft Office Suite, Microsoft Power BI, Unity, ROS2, Godot, GitHub, Git

Experience

Computer Lab Technician, University of Arkansas IT Services – Fayetteville, AR Dec 2024 – Present

- Assisted users on how to effectively use lab equipment and follow lab protocols
- Provided maintenance to computer labs around campus, diagnosing and resolving technical issues

Information Technology Intern, Optus, Inc. – Jonesboro, AR June 2026 – Aug 2026

- Built and maintained financial reports in Power BI, writing T-SQL queries against Microsoft SQL Server databases to extract, transform, and visualize key business metrics
- Migrated Salesforce Workflow Rules to Flow, ahead of Salesforce's Workflow Rules retirement, improving automation reliability

Research Assistant, I3R at the University of Arkansas – Fayetteville, AR Oct 2025 – June 2026

- Designed and implemented drivers used for robotics in Python and C++
- Tested and validated UI features for 2D/3D image registration software used in medical research

Secondary Technician, KLC Video Security – Texarkana, TX May 2025 – Aug 2025

- Installed and upgraded security systems (cameras, access control, intercoms) for K-12 school districts across Arkansas, ensuring compliance with safety standards
- Collaborated with cross-functional teams to plan and coordinate installations based on client requests and project timelines

Projects

Ms. Pacman on the GameBoy Advance, Honors Programming Paradigms Project

- Developed a Game Boy Advance port of Ms. Pacman in C, implementing game logic, sprite rendering, and ghost AI within the GBA's hardware constraints

Vessel, Intro to Game Design II Project (Active Development)

- Created a turn-based battle system in Unity for a 3D role-playing game, implementing combat mechanics, turn-order logic, and damage calculations as part of a broader team project

The Rescue of Joseph Sawmill, Intro to Game Design I Final

- Built a top-down adventure game in Godot, designing gameplay systems including combat, AI behavior, state management, and scene transitions

KaleiGo, STEM Connect Hackathon Fall 2025

- Collaborated in a four-person team during a hackathon to design and build a map-centric event board, developing a full-stack web application using React, Tailwind, Supabase, and Leaflet
