Education

University of Arkansas Expected May 2028
Bachelor of Science in Computer Science, Minor in Mathematics GPA: 4.0

- Member of the Honors College
- **Relevant Coursework:** Software Engineering, Database Management Systems, GPU Programming, Honors Programming Paradigms, Introduction to Game Design I & II, Linear Algebra

Skills

- **Programming Languages:** C++, C#, Python, SQL (T-SQL, PL/SQL), GDScript, Java, JavaScript
- Experience in Microsoft Office Suite, Microsoft Power BI, Unity, CUDA, ROS2, Godot, GitHub, Git

Experience

Computer Lab Technician, University of Arkansas IT Services – Fayetteville, AR Dec 2024 – Present

- Assisted users on how to effectively use lab equipment and follow lab protocols
- Provided maintenance to 5 computer labs around campus, diagnosing and resolving technical issues

Information Technology Intern, Optus, Inc. – Jonesboro, AR June 2026 – Aug 2026

- Built and maintained financial reports in Power BI, writing T-SQL queries against Microsoft SQL Server databases to extract, transform, and visualize key business metrics
- Migrated 100+ Salesforce Workflow Rules to Flows, ahead of Salesforce's Workflow Rules retirement, improving automation reliability

Research Assistant, I3R at the University of Arkansas – Fayetteville, AR Oct 2025 – June 2026

- Designed and implemented drivers used for robotics in Python and C++
- Tested and validated UI features for 2D/3D image registration software used in medical research

Secondary Technician, KLC Video Security – Texarkana, TX May 2025 – Aug 2025

- Installed and upgraded security systems (cameras, access control, intercoms) for K–12 school districts across Arkansas, ensuring compliance with safety standards
- Collaborated with cross-functional teams to plan and coordinate installations based on client requests and project timelines

Projects

***Vessel*, Intro to Game Design II Project** (Active Development)

- Created a turn-based battle system in Unity for a 3D role-playing game, implementing combat mechanics, turn-order logic, and damage calculations as part of a broader team project

***Ms. Pacman on the GameBoy Advance*, Honors Programming Paradigms Project**

- Developed a Game Boy Advance port of Ms. Pacman in C, implementing game logic, sprite rendering, and ghost AI within the GBA's hardware constraints

***KaleiGo*, STEM Connect Hackathon Fall 2025**

- Collaborated in a four-person team during a hackathon to design and build a map-centric event board, developing a full-stack web application using React, Tailwind, Supabase, and Leaflet

Activities

- **XR at Arkansas**, Vice President
- **Razorback Game Devs**, Treasurer
- **Association for Computing Machinery**, Member
- **College Bowl at the University of Arkansas**, Member
